## What We Offer

**Right Action Summits™ offers customized conversations that harness your best thinking, opportunities, and potential.**

**Right Action “Summits”** are facilitated stakeholder meetings of 2 to 4 days in duration. They are designed to create an aligned vision and collaborative approach to your organization’s future. Stakeholders from *all parts* of the company are present, and extensive pre-work with your organization ensures we focus on the key questions that will create clarity. **Results:** broad-based aligned vision for the entire organization with committed, actionable next steps.

**Right Action “Retreats”** are facilitated retreats of 1 to 2 days in duration. They are designed for executive and performance teams to tackle complex issues and generate breakthrough insights and innovative solutions. **Results:** The team aligns and makes decisions about how it will resolve complex issues.

**Just-in-Time Conversations** occur at your place of business when the stakes are high and facilitated discussion is urgent. These are facilitated meetings for internal teams or alliance partnerships struggling to find common ground and new ideas that lead to better collaboration and innovation. **Results:** The air is cleared, common-ground is identified, and the team or group re-engages with a shared commitment to collaborative success and action.

**Right Action Workshops** are designed to teach the tools we use so that your leaders can facilitate collaborative conversations that deliver alignment, innovative solutions, and clear action. **Results:** Your organization shares common language and tools enabling your leaders to tackle crucial conversations and remain responsive to the ever-changing face of the market, your customers, and the environment.
